INTERACTIVE 3D • DRAG TO ROTATE

01 // ABOUT

BUILDING IDEAS THAT ARE STRUCTURAL, FUNCTIONAL AND MEANINGFUL

Bridging the gap between conceptual architectural thinking and robust computational execution. Every line carries structural purpose.

PRACTICE DOMAINS 02

- ARCHITECTURAL DESIGN
- STRUCTURAL ENGINEERING
- COMPUTATIONAL DESIGN
- BIM & AUTOMATION
- WEB DEVELOPMENT
- UI/UX DESIGN
- DATA & ANALYTICS

02 // SELECTED WORK

01

PRECAST BIM & COMPUTATIONAL STRUCTURAL SUITE

Automated precast design, structural analysis and BIM documentation system. Algorithmically verifies 90mm nominal bearing on inverted-T ledges with zero geometry drift.

REVIT • PYTHON • DYNAMO • C#

EXPLODE 3D ASSEMBLY →

BEARING: 90mm (EN 1992-1-1)

DRAG TO ORBIT

02

THEORY OF STRUCTURES MASTERY LAB

Interactive structural analysis learning platform with real-time computation of shear force, bending moments, and elastic deflections.

JAVASCRIPT • WEBGL • MATH.JS

DRAG POINT LOAD LOCATION (x):

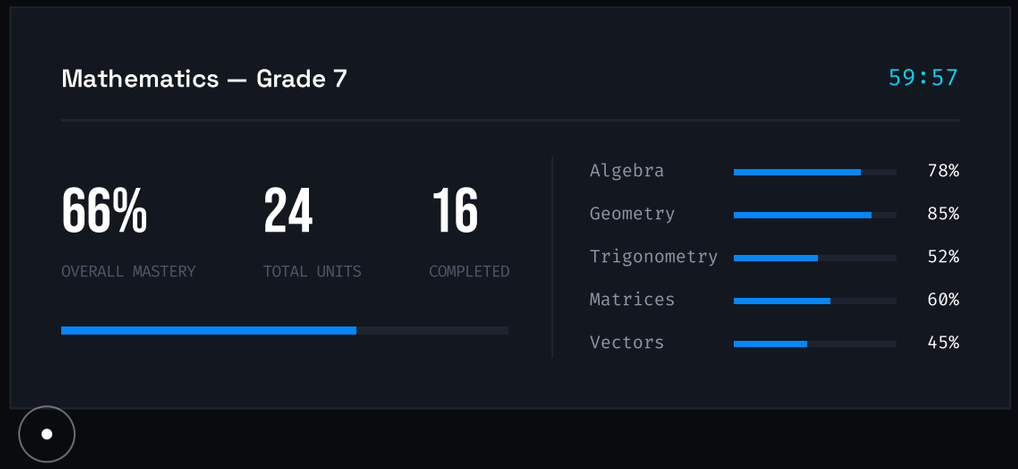

P = 50 kN @ x = 4.0m R_A = 30.0 kN R_B = 20.0 kN M_max = +120.0 kN·m

03

SQ3R EXAM PLATFORM

Offline examination drill and honors certification engine. 96 units, 184 subtopics, and client-side PWA architecture.

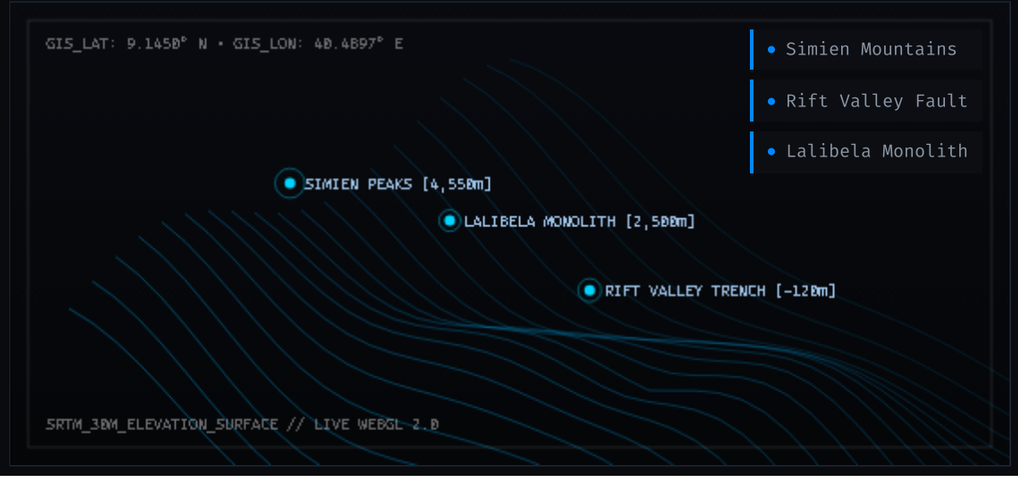

REACT • NODE.JS • INDEXEDDB

04

ETHIOPIA // 360 INTERACTIVE DIGITAL ATLAS

Immersive 3D geospatial atlas capturing geological elevation models, regional fault rifts, and historic architectural landmarks.

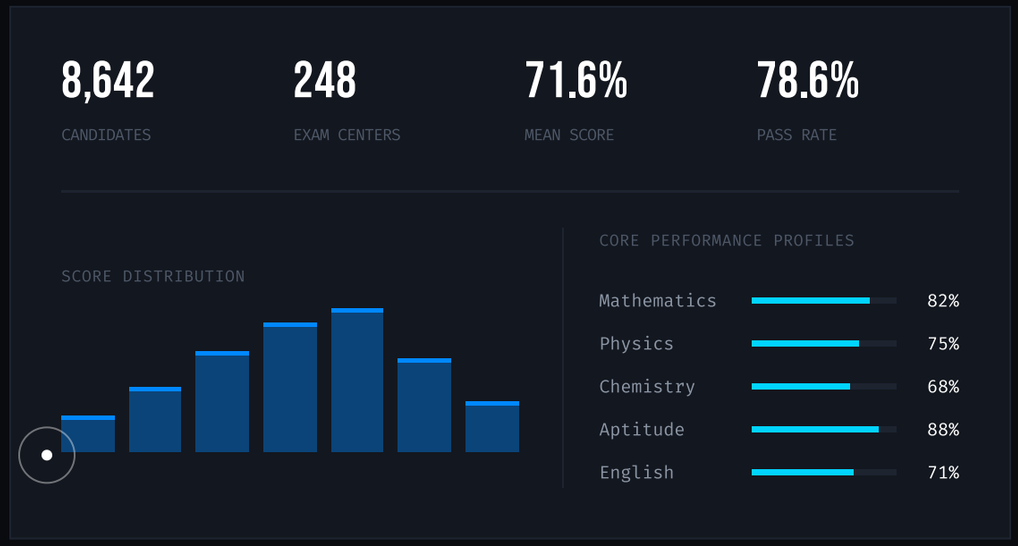

05

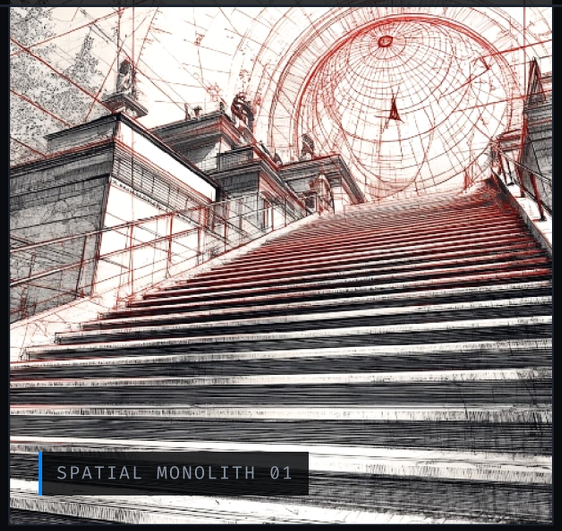

AMT EXAM ASSESSMENT ENGINE

Automated assessment and psychometric evaluation engine for university entrance candidates.

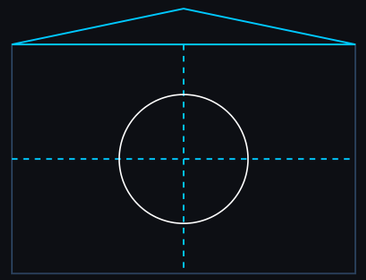

PYTHON • POSTGRESQL • FASTAPI

// FORM FOLLOWS LOGIC.

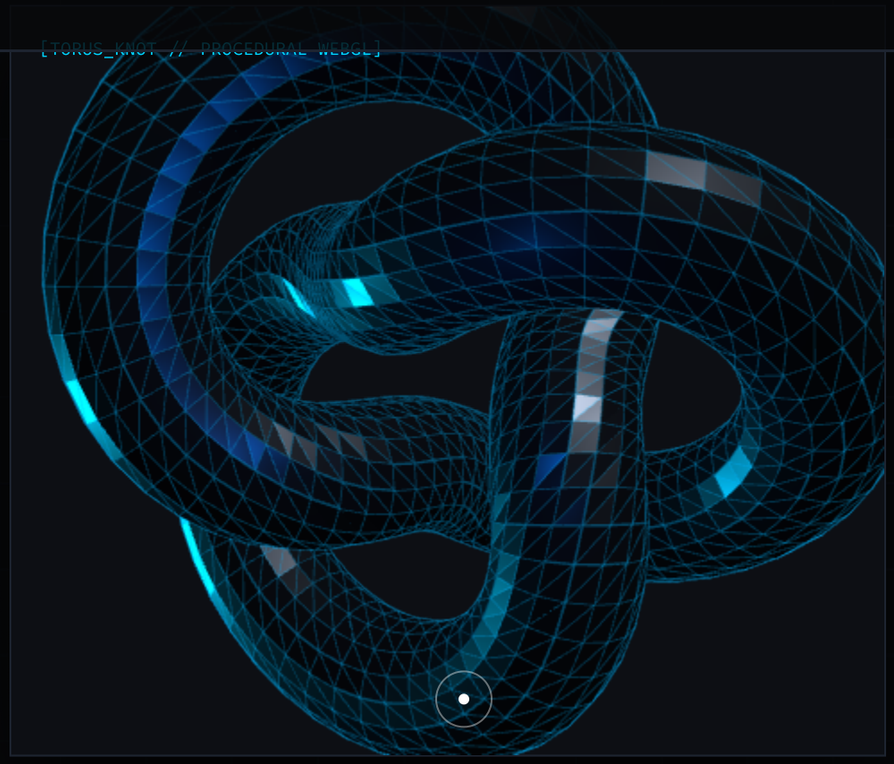

2026 EDITION 0001

04 // TECHNOLOGY / LAB

PARAMETRIC GEOMETRY LAB

Interactive parametric geometry built with code. Rotate, explore and adjust mathematical surface parameters in real time.
